Made in Denmark

PPE Requirements:

Safety goggles or face shields

Dust masks or respirators (especially when using with chemicals or on dusty surfaces)

Ear protection when used for more than 15 minutes

Close fitting protective clothing

Gloves

Appropriate footwear

Design & Compatibility:

- Can be used with cordless drills and pneumatic drills
- **Do not use** with impact drive units
- Ensure that the 6 mm hex drill bit securely fits the drill
- **Max. 1800 RPM** (never exceed the max. RPM of the **Vikan** brush or adapter)

Mounting Instructions:

- Remove battery before attaching brush head or adapter. When using a pneumatic drill, disconnect air supply
- Insert the brush bit or adapter into the drill chuck and tighten securely
- Test the brush at low speed in a safe area for 30–60 seconds to check for any imbalances

Operational Best Practices:

- **Start slow:**
Begin at low speed and increase gradually
- **Let the brush do the work:**
Avoid applying excessive pressure
- **Wet and dry:**
The brush head can be used for both wet and dry applications

Maintenance & Storage:

- Decontaminate the brushes as appropriate after use
- Store tools dry, in a clean, dry place to prevent re-contamination
- Inspect regularly for wear, broken bristles, or rust

Warnings and Prohibited Uses:

Always conduct a thorough risk assessment when introducing a new cleaning tool or process

Always follow the safety and operating instructions provided by the power tool manufacturer

Always follow safety instructions and dilution recommendations for cleaning agents or chemical used with the brush

Only use the adapter on **Vikan branded brush heads**

Only use the brush head and adapter in the direction indicated by the arrows on the product

Do not use damaged or unbalanced brushes

Do not use if any bristles are loose

Do not exceed the brush's rated 1800 RPM

Do not use near flammable materials or liquids

Do not use on sensitive surfaces without first assessing the potential for damage

Do not use with impact drive units
