

Microfibre Drying Cloth

400 mm x 400 mm

Item Number: 692052

The microfibre drying cloth is the ideal finishing touch after washing your car with a mitt or pad. Its unique terry weave creates an exceptionally large surface area, allowing it to absorb far more water than ordinary cloths. The long, looped fibres hold and trap excess moisture, while the double-layered construction enhances both absorption and durability. Designed with rounded corners and a satin edge, it resists fraying and prevents lint from spreading. Simply lay the cloth flat, glide it across the surface, and watch water droplets vanish, leaving your car spotless and streak-free. Cleaning of exterior only.
