

Ultra Hygienic Squeegees

Designed for Hygiene.
Built for Performance.

Setting the Standard in Hygienic Cleaning

Vikan has been setting the standard in hygienic squeegee design for decades—pioneering both single blade and double blade solutions used across the food and beverage industry. Today, we continue to evolve our designs in close collaboration with customers to meet changing cleaning demands.

Maintaining food safety and preventing cross-contamination are critical priorities in hygiene-sensitive environments. Strict regulations and the risk of product recalls place increasing pressure on manufacturers to ensure

both hygienic and visibly clean production areas.

Effective cleaning plays a key role in reducing contamination risks from microbes and residues, while also supporting compliance and protecting brand integrity.

Vikan's Ultra Hygienic Squeegee range is designed to meet these challenges—delivering efficient, reliable cleaning performance in hygiene-critical environments.

- ✔ Supports compliance with food safety standards
- ✔ Reduces cross-contamination risks
- ✔ Improves cleaning efficiency in daily operations
- ✔ Designed for hygiene-critical environments
- ✔ Manufactured from FDA and EU compliant materials

Designed for Hygiene. Built for Performance.

Vikan's Ultra Hygienic Squeegees are developed to meet the strict requirements of food and beverage production. They combine hygienic design with effective cleaning performance, helping you maintain high standards while improving efficiency.

The fully molded construction makes them easy to clean and dry, while the colour-coded system supports safe and organized cleaning practices.

Efficient Cleaning Performance

- ✓ Designed to deliver consistent results, the flexible blade and integrated splash guard help control liquids and improve cleaning efficiency across surfaces.

Tested for Food Safety Compliance

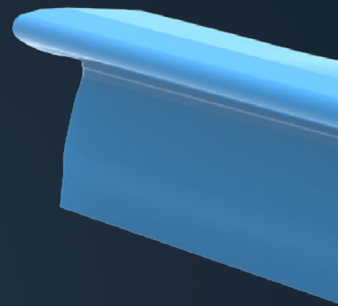

- ✓ Manufactured from materials that meet FDA and EU food contact regulations and designed for use in hygiene-critical environments.

Colour-Coded for Control

- ✓ Available in multiple colours to support hygienic zoning, reduce cross-contamination risks, and promote consistent cleaning practices.

Easy to Clean and Maintain

- ✓ The fully molded design minimises areas where contamination can accumulate, allowing for quick, effective cleaning and drying.

Ultra Hygienic Squeegees

Available in a range of sizes and designs to suit various cleaning tasks.

Manufactured from FDA and EU compliant materials and designed for use in hygiene-critical environments.

A squeegee for every task

**More sizes, more blade options,
more ways to clean**

The Ultra Hygienic Squeegee features a flexible blade that ensures effective liquid removal across floors and other surfaces. The angled design allows for cleaning close to walls and around equipment, while the integrated splash guard helps prevent contamination of surrounding areas.

**Trusted single-blade design,
engineered for hygienic
cleaning performance**

NEW

New flexible blade, same hygienic design

The Ultra Hygiene Flex Squeegee builds on the trusted hygienic design of the original with a softer, more flexible blade that conforms more closely to wet floors.

Developed in close collaboration with customers, it delivers efficient liquid removal when pushing or pulling, making it ideal for demanding wet cleaning environments.

**Enhanced flexibility—without compromising
hygienic design.**
