VIKAN INTRODUCES COLOUR-CODED CLOSABLE DUSTPAN SET

Hygienic cleaning tool leader Vikan has launched a new Closable Dustpan Set that is colour-coded for cleaning-tool segregation in hygiene-sensitive facilities.

The set enables ergonomic, smooth and even sweeping of dry and moist debris, thanks to its angle-cut, 250 mm broom head, sturdy aluminium handle with moulded grip, 320 mm dustpan contact lip, convenient push-pull pan closing system and hygienic storage system.

“With this set, we wanted to make the benefits of our proven-effective and ergonomic sweeping solutions available for use in hygiene-sensitive environments. Thanks to colour-coding – with 5 colours available today – the new Closable Dustpan Set does just this,” says Debra Smith, Vikan’s global hygiene specialist.

NOTE TO EDITORS

About Vikan

Vikan develops, manufactures and markets professional cleaning equipment and systems that deliver high standards of hygiene together with great product choice and value for money. Vikan is at the leading edge of product development and sets the standards in cleaning tools and services for effective, efficient and durable solutions.
